

biography

Jim Garrington

*Marine Mapping and
Search Specialist*

President and chief engineer of Shark Marine Technologies, a developer and supplier of specialized underwater search and survey equipment including ROVs and the Navigator, a diver-assist sonar and video acquisition system used by many navies including the US, UK, Australia, Netherlands and numerous marine search and rescue groups. Shark also conducts ultra-high accuracy underwater surveys. Jim consults for engineering firms, navies, governments, search and rescue, marine biologists and other companies and agencies. He has lectured at universities, and has developed training programs for search and recovery, underwater vehicles, and sonar systems. Jim is also a member of the Ontario Marine Heritage Committee, the Marine Technology Society, the Oceanic Engineering Society and IEEE.
